

Frequently Asked Questions

Does it hurt? What does treatment feel like?

There is little or no sensation during treatment. Occasionally one feels a mild, soothing warmth or tingling.

Are there any side effects or associated risks?

During more than 20 years of use by healthcare providers all over the world, very few side effects have ever been reported. If a patient is allergic to light then they may get a rash or blister for a few days. Occasionally some old injuries or pain syndromes may feel aggravated for a few days, as the healing response is more active after each treatment.

How long does each treatment take?

The typical treatment duration is 5-15 minutes depending on the size of the area being treated and the condition being treated.

How often should the patient be treated?

Acute conditions may be treated daily, particularly if they are accompanied by significant pain. More chronic problems respond better when treatments are received 2-3 times per week tapering off to once a week or once every other week, with improvement.

How many treatments does it take?

This depends on the nature of the condition being treated. For some acute conditions, 1-6 treatments may suffice. Those of a more chronic nature may require 10-15 (or more) treatments. Conditions such as severe arthritis may require ongoing periodic care to control pain.

How long before the results are felt?

You may feel improvement in your condition (usually pain reduction) after the very first treatment. Sometimes you will not feel improvement for a number of treatments. This does not mean that nothing is happening. Each treatment is cumulative and results are often felt after 3-4 sessions.

Can it be used along with other forms of treatment?

Yes. Laser therapy is often used with other forms of therapy, including physical therapy, chiropractic adjustments, massage, soft tissue mobilization and electrotherapy. It is also used after surgery. Other healing modalities are complementary and can be used with the laser to increase the effectiveness of the treatment.

The future of health technology is here today

Treats 300+ conditions

- Back Pain
- Spinal Osteochondrosis
- Sciatica
- Neck Pain
- Frozen Shoulder
- Lower Back Pain
- Radial Carpal (Wrist) Arthritis
- Cervical Spine: Pain, Sprain, Strain
- Hip Joint Arthrosis, Arthritis
- Ankle Joint: Arthritis, Arthrosis
- Hip Tendonitis
- Knee Joint Injuries
- Acute Patellar Tendonitis
- Achilles Tendonitis
- Calcaneal Spur
- Cervical Strain
- Elbow Joint Injuries
- Lumbar Pain
- Hip Sprain
- Wrist Sprain
- Knee Pain
- Disc Herniation
- Tennis Elbow
- Plantar Fasciitis
- ACL Sprains
- Contusions
- Hematomas
- Biceps Tendonitis
- Trigeminal Neuralgia
- Temporal Mandibular Joint Dysfunction

More...

Used in 3,000+ hospitals

- In 10,000+ private practices
- In 30 countries
- Used by professional and Olympic athletes
- 4000+ supportive clinical studies

Throughout the world, laser therapy is used to treat acute/chronic pain, maintain wellness and improve health and athletic performance. Multi Radiance Medical is an international corporation with a presence in over 30 countries. It has been serving customers for 20 years with leading edge therapeutic laser technology.

Heals naturally

- Drug-free
- Non-invasive
- Side-effect free
- Easy-to-use
- Controls inflammation
- Speeds healing
- Accelerates pain relief
- Safe and effective
- Increases joint flexibility
- Pain free treatment

The goal of laser therapy is to deliver light energy units in the form of photons, to damaged cells. The consensus of experts is that photons, absorbed by the cells through laser therapy stimulate the mitochondria to accelerate production of Adenosine Triphosphate (ATP). This biochemical increase in cell energy is used to help transform cells from a state of illness to a stable, healthy state.

Laser therapy uses high powered light to stimulate healthy cell regeneration, reducing pain and increasing wellness.

Ask your healthcare professional how laser therapy can improve your health and wellness.

"This simple procedure offers tremendous results in a relatively short amount of time."

Dr. Maria Hofmaier
